Nationality: Pakistani | Location: Islamabad, Pakistan

Relocation: (Open to Gulf Region: UAE, KSA, Qatar)

## CAREER SUMMARY

---

**Senior 3D Visualizer** with 11+ years of experience in architectural visualization, including 5+ years at **Imarat Group of Companies** and 6 years at **Pixarch**. Specialized in high-end **3D rendering, animation, and design communication** for real estate and architectural projects. Expert in **3ds Max, V-Ray, D5 Render**, with strong post-production skills in **Photoshop, After Effects, and Premiere Pro**. Proven ability to deliver photorealistic visuals and animations that support design and marketing goals in fast-paced, collaborative environments. Committed to producing creative, precise, and impactful visuals tailored for international standards and the Gulf market.

## CORE SKILLS & SOFTWARE PROFICIENCY

---

- **Core Software:** Autodesk 3ds Max, Vray, D5 Render.
- **Complementary Software:** Adobe Suite (Photoshop, After Effect, Premiere Pro) Lumion & SketchUp.
- **Specialization:** High-rise renders, 360-degree panoramas, 3D walkthroughs and Isometric views.
- **Workflow Optimization Tools:** Familiarity with plugin and scripts to streamline rendering and modeling process in 3d max.

## EDUCATION

---

### Bachelor of Commerce

University of Karachi | Jan 2012

### Diploma in Digital Media

Skill Development Council | 2011

## KEY PROJECTS

---

## Work History

---

### IMARAT GROUP OF COMPANIES- LEAD 3D VISUALIZER- Islamabad, Pakistan

February 2020 - Current

#### Key Roles:

- Lead a 3D visualization team of 5–6 artists in producing high-quality renderings and animations for real estate projects, including luxury residential developments, commercial properties, and mixed-use spaces.
- Collaborated with architects and interior designers to refine design concepts, translating 2D plans into accurate 3D models that align with design intent.
- Expert in bringing projects to life with dynamic 3D high-rise renderings, engaging walkthrough, breathtaking 360-degree panoramas, and detailed isometric views.
- Optimized workflow efficiency by implementing new rendering techniques, which improved project turnaround time.
- Proficient in Adobe Suite and skilled in enhancing rendered images and animations through post-production techniques.
- Mentor and train junior and mid-level visualizers, sharing knowledge of best practices, techniques, and software usage to elevate overall team performance.

### PIXARCH ARCHITECTURAL VISUALIZATION- 3D VISUALIZER- Karachi, Pakistan

December 2013- January 2020

#### Key Roles:

- Develop accurate 3D models and textures based on design specifications, collaborating with senior team members to improve techniques.
- Establish lighting setups and conduct initial renderings with V-Ray to generate high-quality visuals.
- Organize and manage 3D assets, textures, and materials to ensure efficient workflow and easy access for the team.
- Assist in post-production tasks using Adobe Photoshop, adjusting colors and adding effects to finalize renders. Ensure that visuals align with project specifications and enhance overall quality.
