EXPERTIES

- **Planning / Presentation.**
- **3D Visualizing** (Exterior & Interior).
- **Project Management.**
- **Mobilization / IFC / Shop / As Build Drawings.**

RESPONSIBILITIES

- Developed design strategies and architectural plans for high-rise, commercial, and residential projects.
- Oversaw the preparation of mobilization plans, IFC, shop, and as-built drawings in accordance with project standards.
- Directed the design process from conceptualization to detailed development and execution stages.
- Supervised on-site activities to ensure adherence to design intent and construction quality.
- Created innovative facade, interior, and exterior design concepts aligned with client requirements.
- Produced advanced 3D models, visual animations, and comprehensive design presentations.
- Designed master plans and landscape layouts emphasizing functionality and aesthetics.
- Coordinated all design-related disciplines to maintain consistency and technical accuracy.
- Compiled reports and progress logs to monitor and document project milestones.
- Ensured dimensional precision and alignment across drawings and construction details.
- Reviewed, verified, and reconciled architectural drawings for accuracy and compliance.
- Upheld building codes, standards, and municipal bylaws throughout the design process.
- Supervised and executed intricate architectural elements with attention to technical detail.
- Liaised with clients to define project goals, refine requirements, and deliver tailored design solutions.
