AHMED GHONIM

SELECTED WORKS
& DESIGN PHILOSOPHY

Hello, There!

I'm **Ahmed M. Ghonim**, an **Egyptian** interior designer passionate about turning ideas into visually compelling spaces. My inspiration comes from the diverse interior and architectural styles I've admired across the world, from modern public spaces to elegant residential designs. Through my own interior design business, I help clients transform everyday spaces into artistic, functional environments tailored to their vision.

PROJECT - 01

DETAILS

The client's vision for this apartment was to create a unique and inviting atmosphere through a balanced fusion of semi-Nordic and modern minimalist styles. The design focuses on clean lines, soft tones, and functional elegance to deliver a calm yet sophisticated living experience.

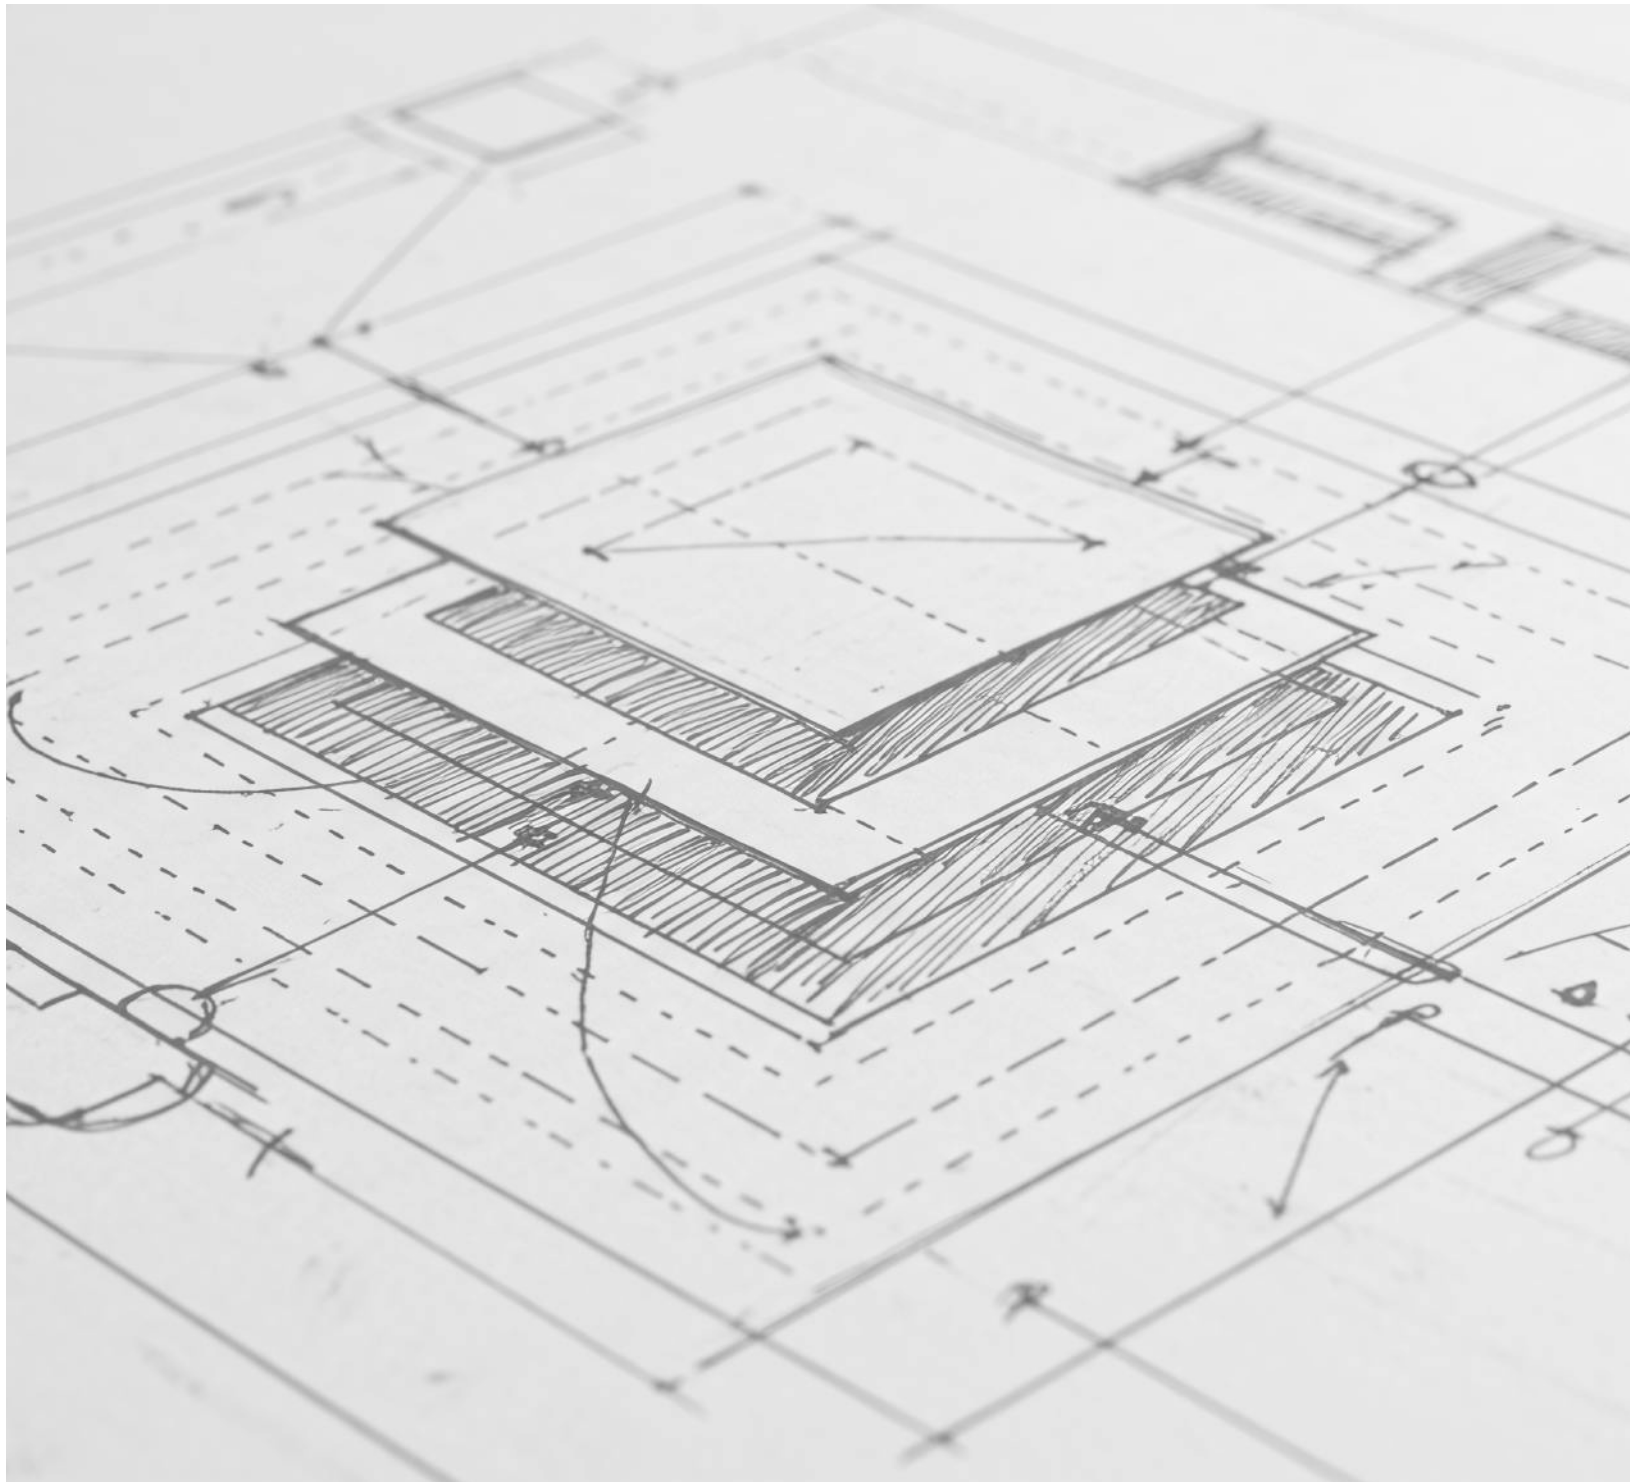

Description

This project aimed to elevate a standard apartment into a warm and welcoming living experience tailored to the client's comfort and lifestyle. Through the use of warm ambient lighting between 3700K and 4500K, combined with cozy materials, soft finishes, and carefully selected textures, the space was designed to promote relaxation, warmth, and a true sense of home within the living and bedroom areas.

PROJECT - 02

kitchen design which brings the outside enviroment inside through its big windows

This kitchen design was created to establish a strong connection between the indoor space and the surrounding natural environment. Large floor-to-ceiling windows allow natural light to flood the interior while offering uninterrupted views of the forest outside, creating a calm and refreshing atmosphere throughout the day. The combination of clean white cabinetry and light maple wood finishes adds warmth and softness to the minimalist design language. At the center of the space, a functional kitchen island acts as both a social and practical focal point, enhancing the openness of the layout. The overall design delivers a bright, modern, and inviting experience where nature becomes part of the interior itself.

PROJECT - 03

POWER JUICE

a store made to serve both energy drinks, smoothies and coffee to all gym clients to provide them with their daily protien intake and add more socail vibe to their life after training.

PROJECT - 04

BEDROOM DESIGN

This bedroom was designed for a unique private villa located in the Al Shoala District area of Dammam. The design concept focused on creating a rich and relaxing atmosphere through the balanced use of deep red tones combined with warm brown finishes, adding both visual depth and a sense of comfort to the space. Carefully selected materials, soft lighting, and textured surfaces were used to enhance the feeling of privacy and relaxation within the room. The overall composition delivers a bold yet elegant bedroom experience tailored to the client's lifestyle and personal taste.

PROJECT - 05

NURSERY DESIGN

Designed for "Slime Rush," a playful nursery experience at Amwaj Mall in Dhahran, this space turns imagination into the main attraction. Kids can explore slime-based play, shape creation, and hands-on creativity in an environment built for freedom and fun. A dedicated UV black-light room adds a surreal twist, where phosphorescent drawings glow on the walls, turning every idea into a living artwork.

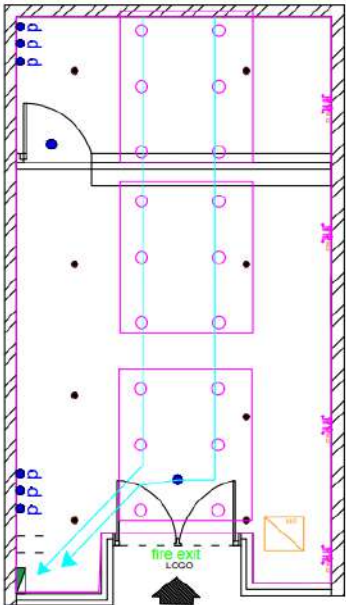

The concept is all about breaking limits, where creativity isn't guided... it's unleashed.

Front store design and signage

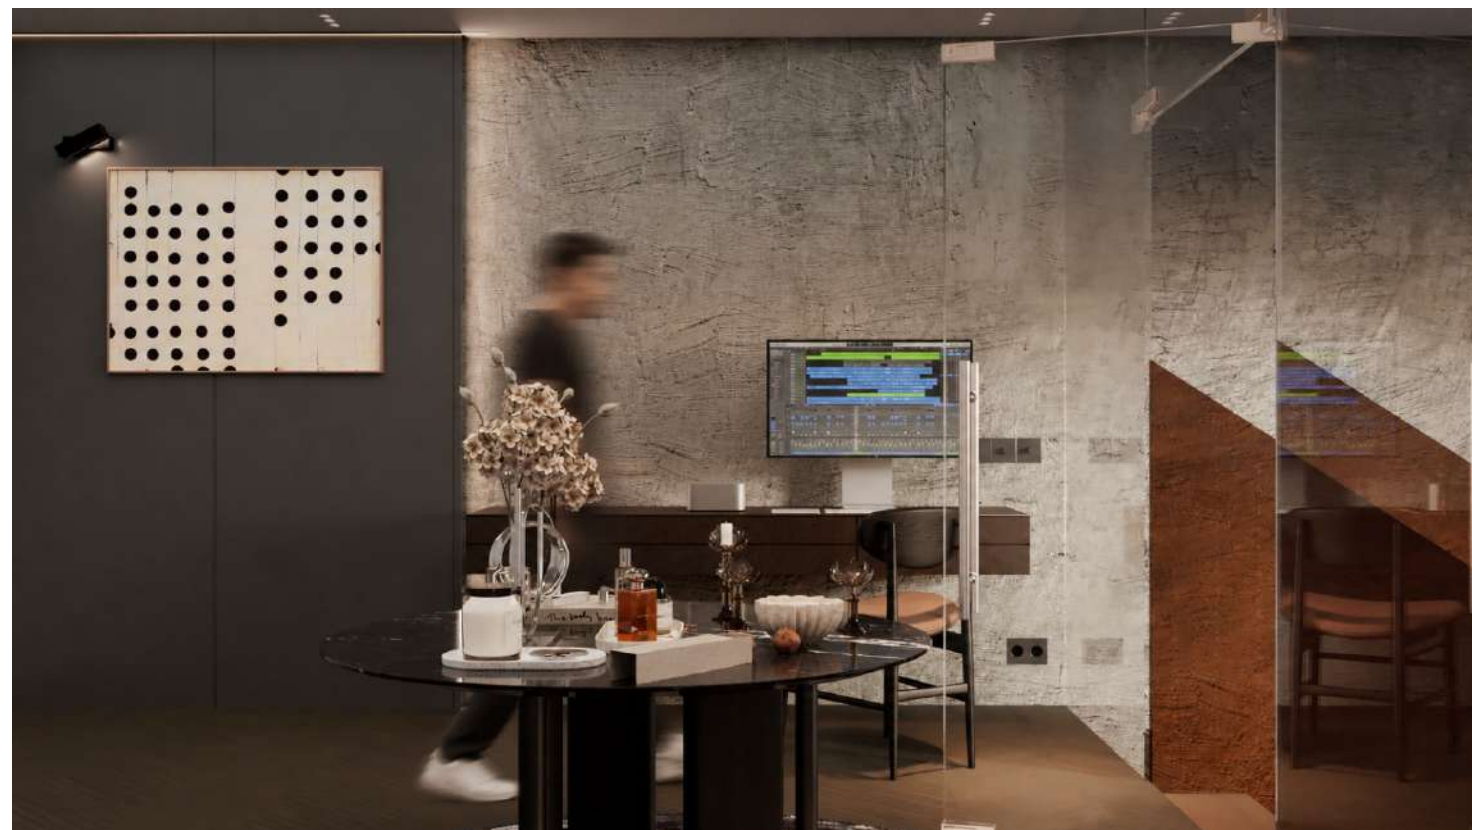

- The glass must be a minimum of 12mm tempered clear glass, with U-channels fully recessed and concealed on all sides, or submit a frame for approval.
- The glass must be one continuous piece, extending the full height, with a minimum width of 1.20 meters.
- Door height to be min. 3.00m.

PROJECT - 05

COFFEE ROASTERY

Designed for two project managers working at Saudi Aramco, this space blends work, passion, and lifestyle into one cohesive experience. The concept introduces a private coffee roastery where the clients can roast, experiment, and craft their own blends. Alongside the roasting area, a relaxed lounge zone was created for downtime, offering a calm environment to unwind and enjoy the process.

The space also supports their online coffee business, turning the entire setup into a functional yet atmospheric hub for both production and creativity.
