Education

Bachelor in Respiratory Care Science. GPA: 4.4/5

2020 - 2025

Prince Sultan Military College of Health Sciences, Dahrhan

- Comprehensive understanding of respiratory anatomy and physiology, focusing on the respiratory system's structure and function.
- In-depth knowledge of chronic respiratory diseases, including COPD and asthma, and effective management strategies to improve patient care.
- Understanding the principles of oxygen therapy and the use of mechanical ventilation to support patients with respiratory insufficiencies.
- Experience with performing and interpreting pulmonary function tests (PFTs) to assess lung capacity and airflow limitations.
- Analysis of gas exchange mechanisms in the lungs and their significance in maintaining homeostasis.
- Knowledge of the principles and techniques involved in sleep medicine, with a focus on the assessment and treatment of sleep-related respiratory disorders such as sleep apnea.

Courses

Airway Management Course

Nov 2023

Respiratory Care Scientific Conference

Sep 2023

Internships

Respiratory therapist

Jul 2024 - Jul 2025

Intern Respiratory Therapist, King Fahad Military Medical Complex in Dahrhan

- Assisted in the assessment and diagnosis of respiratory disorders, utilizing advanced diagnostic tools under the supervision of licensed respiratory therapists.
- Participated in the administration of mechanical ventilation and airway management for patients in critical care settings, gaining hands-on experience with ventilators.
- Collaborated with healthcare professionals to develop and implement comprehensive patient care plans tailored to individual respiratory needs.
- Educated patients and their families on respiratory health, disease management, and lifestyle modifications to support improved outcomes and quality of life.
- Performed patient assessments to evaluate respiratory function and identify areas for improvement in treatment plans.
- Implemented advanced airway management techniques, including intubation and suctioning, while ensuring patient safety and comfort.
- Participated in the evaluation and management of patients with sleep-related respiratory disorders, applying knowledge of sleep medicine to design effective treatment options.
