PROFILE

A fresh Computer Engineering graduate with a strong interest in networking and cybersecurity. Fast learner with a passion for developing practical skills in network systems and IT infrastructure, seeking continuous growth and hands-on experience.

EDUCATION

Bachelor's in Computer Engineering

King Saud University

PROJECTS

Design and development of a humanoid walking robot

Designed and implemented a self-balancing humanoid robot capable of walking and maintaining stability using sensors and control algorithms. The robot uses gyroscopes and accelerometers to detect posture changes and adjusts its actuators to stay balanced in different environments.

COURSES
